*(*168 clinical hours required for each course)*

Total: 30 credits

Students entering the Post-Master's certificate FNP program must have prerequisites in advanced pharmacology, advanced physical assessment (with 56 clinical hours), and advanced pathophysiology prior to beginning clinical coursework.

Per the WV Board of Nurse Examiners, for prescriptive authority, "Proof of successful completion of at least forty-five (45) contact hours of education in pharmacology and clinical management of drug therapy under a program APPROVED BY THE BOARD, fifteen (15) of which shall be completed within the two (2) year period immediately before the date of application."

Acceptance of a prior advanced pharmacology course is evaluated on an individual basis upon entry into the certificate program. If pharmacology coursework is greater than the two year requirement for licensure in the state of West Virginia, the student will be required to repeat the advanced pharmacology course. In addition, each state has similar licensure requirements. It is the student's responsibility to be aware of other state requirements for obtaining prescriptive authority.
